Henry Francisco Retana Jimenez

Senior Software Engineer / Technical Lead
Costa Rica · Remote
henryfrj@gmail.com | +506 8729 9096

Professional Summary

Senior Software Engineer and Technical Lead with 15+ years of experience delivering scalable cloud platforms and leading engineering teams in fast-paced environments. Experienced in driving architectural decisions, improving delivery effectiveness, and scaling team structures to support product growth. Proven track record modernizing legacy systems, enhancing performance, and enabling reliable, high-impact releases across Azure and AWS environments.

Key Contributions

- Scaled engineering teams from single-team structures into multi-squad models.
- Influenced architectural decisions across multiple enterprise platforms.
- Mentored engineers and emerging tech leads.
- Improved delivery effectiveness through process and collaboration enhancements.
- Introduced Infrastructure as Code practices using Terraform.
- Led technical hiring and interview processes.

Professional Experience:

Senior Full Stack Developer – Oceans Code Expert | 2025 – Present

- Lead technical architecture and design decisions for enterprise-grade web applications.
- Develop and optimize scalable frontend solutions using React and Next.js to enhance performance and user experience.
- Build and maintain backend services using Node.js and .NET Core (C#).
- Design, document, and evolve REST APIs supporting distributed and high-availability systems.
- Implement Infrastructure as Code (IaC) using Terraform to provision and manage cloud resources in a scalable and consistent manner.
- Contribute across the full stack to ensure seamless integration between frontend, backend, and cloud infrastructure.
- Build and maintain CI/CD pipelines to improve deployment reliability and accelerate delivery cycles.
- Drive performance, scalability, and maintainability improvements across applications.
- Improved platform scalability and deployment consistency through infrastructure automation and CI/CD enhancements.

Technical Lead – Gorilla Logic | 2020 – 2024

- Led cross-functional engineering teams delivering enterprise-scale web platforms for international clients.
- Partnered closely with Product Managers and stakeholders to drive requirements gathering, align technical strategy with business goals, and ensure delivery of high-value solutions.
- Defined technical architecture and continuously contributed to architectural evolution and modernization of legacy systems.
- Acted as a key technical decision-maker, influencing system design, implementation strategies, and scalability direction.
- Designed and maintained REST APIs and microservices supporting high-availability applications.
- Continuously monitored application performance across cloud environments including Azure and AWS, proactively identifying bottlenecks and improving system reliability.
- Led ongoing database performance improvements through query optimization, structure enhancements, and scalability strategies.
- Guided Agile ceremonies and improved team effectiveness through motivational leadership techniques and process optimization initiatives.
- Mentored engineers, including onboarding and coaching new team members and newly appointed tech leads.
- Participated in technical interviews and candidate selection to strengthen team capabilities.
- Contributed hands-on to development while leading delivery and maintaining engineering excellence.
- Optimized Angular and React applications, improving performance and reducing production defects.
- Implemented CI/CD pipelines in Azure DevOps, increasing release frequency and deployment stability.
- Enabled more reliable releases and improved system stability through performance monitoring and architectural modernization.

Full Stack Developer – EX2 Outcoding | 2019 – 2020

- Designed and maintained web applications, APIs, and relational databases using Angular, .NET Core, Node.js, and SQL Server.
- Built scalable backend services supporting business-critical workflows.
- Optimized system performance and led database and application migrations.
- Took on technical leadership responsibilities in the absence of a formal Tech Lead, helping guide architecture and engineering decisions.
- Introduced process improvements that enhanced team collaboration and delivery efficiency.
- Contributed to the adoption and integration of Infrastructure as Code (IaC) using Terraform**.**
- Helped stabilize delivery and technical direction during a leadership gap.

Software Developer / Technical Lead – Coinca Telematics / Namutek | 2015 – 2019

- Developed cloud-based platforms supporting telematics, tracking, and business operations across Azure and AWS environments.
- Built web and mobile applications using React, Node.js, and SQL databases.
- Designed APIs and backend services to process real-time operational data.

- Led technical decision-making and coordinated development efforts across the organization.
- Played a key role in scaling the engineering structure from a single team into multiple specialized teams, improving agility, ownership, and delivery effectiveness.
- Participated in technical interviews and hiring processes to help grow and strengthen the team.
- Conducted regular 1:1s and provided ongoing mentorship to support professional growth and team alignment.
- Helped establish clearer development workflows and collaboration practices, enabling faster and more reliable product releases.
- Improved delivery agility by helping transition from a single-team model to multiple focused squads.

Data Management QA Analyst – Experian | 2014 – 2015

- Analyzed large datasets using SAS, DB2, Toad, and SQL databases.
- Built Tableau dashboards to support business reporting and data visibility.
- Automated data validation and quality checks using custom scripts.
- Developed Linux-based automation scripts for data handling, manipulation, and reporting processes, improving efficiency and reducing manual effort.
- Reduced manual data handling through automation.

Tech Support – Microsoft Answer Desk *2013 – 2014*

- Diagnosed and resolved software and system issues for Microsoft products.
- Provided remote technical support and troubleshooting.

Network Support / Team Lead – Verizon *2011 – 2013*

- Resolved network and connectivity issues for enterprise customers.
- Led a support team and tracked performance metrics.

IT Support / Developer – Energía Inteligente / EBS Seguros *2007 – 2008*

- Provided IT and network support.
- Migrated applications from VB6 to .NET.
- Developed and maintained internal databases and systems.

Technical Skills

Languages: C#, JavaScript, TypeScript
Frontend: Angular, React, HTML5, CSS3
Backend: .NET, ASP.NET, REST APIs, Microservices, Node.js
Cloud & DevOps: Azure, AWS, Azure DevOps, CI/CD, Terraform
Databases: SQL Server, MySQL, Cosmos DB, DB2, MongoDB, PostgreSQL
Leadership & Practices: Agile Leadership, Technical Mentorship, System Design, Performance Optimization, Delivery Improvement

Languages
Spanish: Native
English: C1 (Advanced Professional)

Education

DB2 Database Administration – Universidad Cenfotec
Computer Science – Universidad Hispanoamericana
Additional Training: English (INA), GNU/Linux (CIPET**)**
